Multimedia & Communication Technology
Erasmushogeschool Brussel

PROFILE

Young and enthousiastic designer with a focus on User Experience, committed to delivering impactful designs that meet user needs.

With a strong foundation in creative problem-solving and a keen eye for detail, I have acquired expertise in delivering user-centered design solutions within the digital space.

EXPERIENCE

UX/UI Designer

sept 2022 - now
Fujitsu

- Designed intuitive interfaces for blockchain-based (Web3) applications using wireframes and interactive prototypes to communicate design concepts effectively.

- Worked with developers, product owners and stakeholders to integrate design with overall product development.

- Used user feedback and usability testing to refine and enhance blockchain application usability, iterating on design elements and information architecture.

Internship designer
feb 2020 - apr 2020
Deloitte Digital

- Dedicated the majority of my time and efforts to honing my skills in UX design.

- Participated in usability testing sessions to identify pain points and gather feedback for design improvements.

- Engaged in A/B testing initiatives to evaluate variations in user interfaces to enhance user experience.
